

A School Board member should work to fix the public school system and not help create a mass exodus. I am a supporter of giving our parents as much choice in their child's education as possible so long as it doesn't negatively impact the district as a whole. Charter Schools are not held to the same regulations as traditional public schools and my concern will always be with transparency and accountability and I believe there will be less of both if we grew our charter schools.

- Charter schools need to be held to more stringent standards.

Question 20:

1. My biggest thing to work on is auditing the system. Everything needs to be rigged in favor of our citizens just like the constitution is and our school district is currently not operating in such a manner. Protect the small gov't mindset where the stakeholders have a say in operations. From policies to the underlying procedures/culture, it is time to reinstate the proper checks and balances to secure our citizens representation.
2. Cut wasteful spending and push to keep necessary expenditures as local as possible.
3. Focus on curriculum reform. Get us back to the basics and pivot us away from the political changes being made. Their minds are more valuable than gold or silver and needs to be protected as such. We need to focus more on science & technology, mathematics and reading comprehension instead of using school time to have kids watching CNN.

General Comments:

I am a constitutionalist and I do not take the decision to run lightly. If elected I promise to fight to establish a better presidency regarding our unalienable constitutional rights as they pertain to our schools and I will establish loophole proof policies that help give our community members an established path to finding resolution to the inquiries and complaints they bring forward.

Thank you for taking the time to review my responses.
